

REST API Reference

Version:	v1 (2022)
Author:	Dev Team
Date:	2022-09-01
Status:	OUTDATED

WARNING: This API version is deprecated. Endpoints may no longer exist.

Base URL

https://api.acme.com/v1

Authentication

API Key in header: X-API-Key: <your_key>

Endpoints

GET /products

Returns a list of all products.

POST /orders

Creates a new order. Payload schema TBD - ask Dev team.

DELETE /orders/{id}

Cancels an order. Note: doesn't work in staging (known bug).

Rate Limits

100 req/min per API key. (May have changed - confirm with backend team.)
