

System Architecture - Microservices Migration

Version: v2.0-DRAFT
Author: James Turner
Date: 2023-02-28
Status: DRAFT - NOT APPROVED

WARNING: DRAFT - Do not distribute. Pending review from Platform team.

Overview

Proposed migration from monolith to microservices.

This document was shared for initial review. Several sections are incomplete.

Proposed Components

- + API Gateway: Kong (TBC - might switch to AWS API GW)
- + Auth Service: Keycloak
- + Product Service: FastAPI
- + Order Service: Node.js [DRAFT]
- + Database: Per-service databases (PostgreSQL / MongoDB)

Open Questions

- + Service mesh: Istio vs Linkerd (not decided)
- + CI/CD tooling: Jenkins vs GitHub Actions (not decided)
- + Observability stack: TBD

TODO

- + Add network diagram (James to provide by end of sprint)
- + Security review required before approval
