

IMPORTANT - Read Before Using Any Docs

Version: N/A
Author: Sarah Kim
Date: 2024-09-01
Status: PINNED

If you are reading this, you are trying to find documentation.
Please read the following before using anything in this folder.

The Problem

Our docs are scattered across:

- + This shared drive (you're here now)
- + Confluence (space: ACME-INTERNAL - half the pages are stale)
- + GitHub repo wikis (3 different repos, none complete)
- + Email threads (seriously)
- + Slack messages
- + People's heads

Which Version to Use

When in doubt: ask. The filename often lies.
Files with 'FINAL' in the name are rarely final.
Files with 'USE_THIS_ONE' may not be the one to use.

The Plan

We have been 'about to fix this' since Q3 2022.
As of September 2024, a proposal is on the table to move everything to a docs-as-code solution. Watch this space.

In the Meantime

- + For architecture: ask James (but he's usually in meetings)
- + For API docs: ask Priya
- + For deployment: ask Carlos or Sarah
- + For runbooks: there are no good runbooks. Sorry.
